## Experience

- **SITRA (South India Textile Research Association)** — Coimbatore, TN
  *Lab Technician* — *Feb 2020 - Present*
  - **Yarn Quality Analysis & Testing** : Analyzed 100+ yarn samples weekly using Uster Classimat 5, identifying yarn faults (thick places, thin places, neps, and contamination), documenting quality reports, and supporting corrective actions to improve production consistency.
  - **Defect identification** : Analyzed yarn defects including thick places, thin places, neps, hairiness, and contamination, providing actionable feedback to support corrective actions, improve quality, and reduce material waste.
  - **Textile Quality Assurance** : Operated yarn testing systems to perform accurate quality analysis, ensuring strict adherence to standardized testing procedures, equipment calibration, and laboratory protocols. Maintained testing accuracy and consistency by verifying instrument performance, resulting in reliable test data for quality evaluation and production decision-making.
- **STOLL India Pvt. Ltd.** — Noida, UP
  *Assistant Technician* — *July 2018 - Nov 2018*
  - **Machine Installation & Servicing** : Successfully completed training in machine hardware assembly, Assembled and serviced flat knitting machines, ensuring operational efficiency in production environments.
  - **Mechanical Maintenance** : Performed servicing and basic maintenance of flat knitting machines in a manufacturing unit, helping to keep machine running smoothly, reduced machine downtime by 15-20% through preventive maintenance strategies.
  - **Machine Programming & Fabric Design** : Completed M1+ programming software training for flat knitting machines, Developed and modified knitting programs using M1+ software, supporting optimized fabric design.
- **Murugan Mills (NTC)** — Coimbatore, TN
  *Project Intern* — *Apr 2017 - May 2017*
  - **Industrial Internship** : Completed a four-week industrial internship at Coimbatore Murugan Mills (NTC), gaining two weeks of practical exposure to spinning operations from fiber preparation through autoconer processes and two weeks of hands-on experience in weaving operations

## Projects

- **Study Comfort Properties of Tri-Layer Knitted Fabric**: Developed a tri-layer sportswear fabric using bamboo, micro-denier polyester, and polypropylene on a double jersey knitting machine, improving moisture management, thermal comfort, and overall wearer comfort through performance testing.
- **AI Yarn Defect Assistant**: Developed an AI-powered textile defect assistant using Python, Streamlit, and Gemini API to analyze yarn test data and generate actionable quality recommendations.
  Website: ai-yarn-defect-assaitant.streamlit.app
- **Personal Resume AI BOT**: Built a responsive Resume AI chatbot with Python and Streamlit, integrating Google Gemini API to deliver personalized resume reviews, skill recommendations, and career guidance.
  Website: resume-ai-bot.streamlit.app
- **AI Yarn Defect Assistant**: Developed an AI-powered textile defect assistant using Python, Streamlit, and Gemini API to analyze yarn test data and generate actionable quality recommendations.
  Website: ai-yarn-defect-assaitant.streamlit.app

## Programming Skills

- **Languages**: Python, C, HTML, Java **Technologies**: Adobe PS/AI, React

## Education

- **Bharathidasan University of Dist. Edu.** — Trichy, TN
  *Bachelor of Science in Computer Science; CGPA: -* — *2025 – 2027 (Pursuing)*
- **PSG Polytechnic College** — Coimbatore, TN
  *Diploma in Textile Technology; CGPA: 8.95* — *2015 – 2018*
