PROFESSIONAL SUMMARY

Textile quality professional with 5+ years of experience in yarn testing and laboratory data analysis, now building skills as a Python and MERN full stack developer. Currently analyze test data and produce quality reports using internal software at SITRA, and have deployed two AI-powered web apps using Python, Streamlit and the Gemini API. Pursuing a B.Sc. in Computer Science; seeking a junior full stack or applied AI role where textile and industrial data knowledge is an advantage.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **MERN Stack:** MongoDB (NoSQL), Express.js, React.js, Node.js
- **Frontend:** HTML, CSS, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, SQLite
- **AI / GenAI:** Gemini API, LLM application development, Prompt Engineering
- **Tools:** Git, GitHub, Docker, Supabase, Vercel, Render, Postman

WORK EXPERIENCE

Testing Assistant (Data Analysis & Reporting) Feb 2020 – Present
SITRA (South India Textile Research Association), Coimbatore, Tamil Nadu

- Tested and analyzed yarn samples on Uster Classimat 5, identifying thick places, thin places, neps, hairiness and contamination.
- Analyze test results and generate quality reports using SITRA's internal reporting software, turning raw data into defect findings that support corrective action and reduce material waste.
- Follow calibration schedules and laboratory protocols to keep test results accurate and repeatable.

Assistant Technician Jul 2018 – Nov 2018
STOLL India Pvt. Ltd., Noida, Uttar Pradesh

- Assembled, serviced and maintained flat knitting machines for reliable production.
- Performed preventive maintenance that contributed to a 15–20% reduction in machine downtime.
- Developed knitting programs in M1+ software for fabric development.

PROJECTS

LostNest (Lost & Found Platform) | MongoDB, Express, React, Node.js | Live Demo | GitHub

- Built a full-stack lost and found app with JWT login, bcrypt hashing and 10 REST API endpoints.
- Added ownership-proof claims and a MongoDB TTL auto-purge; deployed on Vercel, Render and Atlas.

AI Textile Defect Assistant | Python, Streamlit, Gemini API, Docker | Live Demo | GitHub

- Built an app that turns yarn test data into a quality rating, root causes, fixes and a PDF report.
- Designed around real lab workflows from 5+ years of yarn quality testing.

AI Resume Chatbot | Python, Streamlit, LLM API | Live Demo | GitHub

- Built and deployed a chatbot that lets recruiters query resume details conversationally and get context-aware answers.

EDUCATION

B.Sc. Computer Science (Distance), Bharathidasan University for Distance Education 2025 – 2027 (expected)
Diploma in Textile Technology, PSG Polytechnic College, Coimbatore 2015 – 2018
